

SHIPLEY MEGAPOSIT® MF®-300 SERIES DEVELOPERS

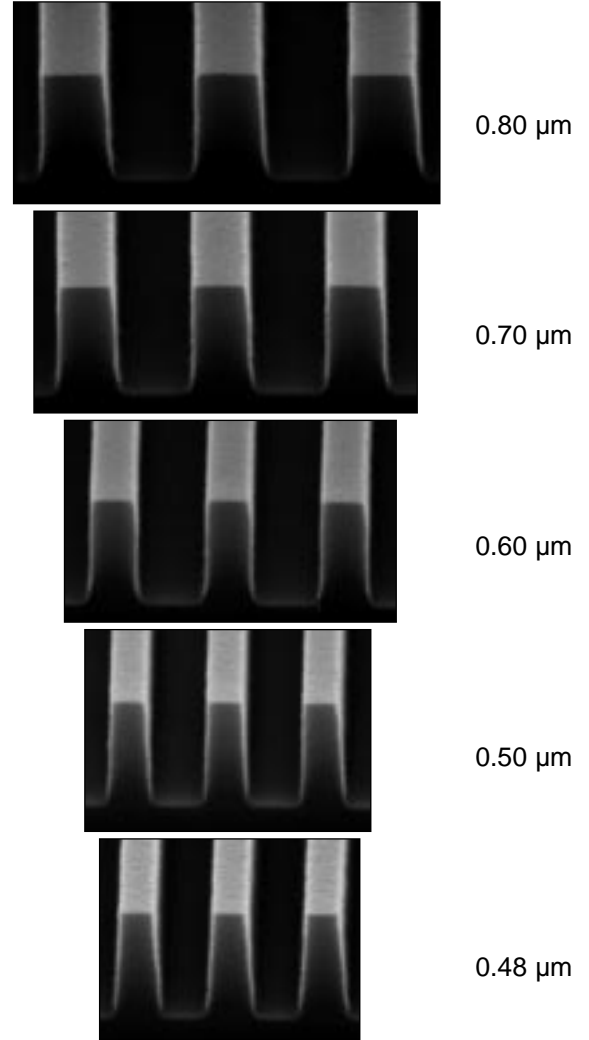

Introduction

MF-300 Series Developers are surfactant containing developers designed to provide high throughput and wide processing latitude for g-Line applications in a variety of processes.

Features

- ◆ Designed for g-Line applications
- ◆ Ideal for spray and spray/puddle develop processes
- ◆ High throughput
- ◆ Wide process latitude
- ◆ No scumming

g-Line Application

150 mJ/cm²
S1813®/MF®-319

Lot-to-lot Consistency

- ◆ Tightly controlled product specifications
- ◆ Total systems functional testing
- ◆ Statistical process control
